FIPRONEX® DROP ON

Topical Solution

Long-acting ectoparasiticide in dermical solution

Formulation

Fipronil 100 mg, excipients q.s.ad. 1 mL

Indications

Prevents reinfestations and rapidly eliminates the stress in pets produced by the presence of fleas and ticks, the loss of blood, itching and allergic reactions due to fleabites. Its residual effect prevents reinfestations, killing fleas for a minimum period of 60 days, and ticks for a period of 30 days. The protection on adult dogs against fleas can extend for more than 90 days.

Dosage and Administration

According to the weight of the animal: Up to 10 kg of b.w.: 1 pipette of 0.67 mL, from 11 to 20 kg of b.w.: 1 pipette of 1.34 mL, from 21 to 40 kg of b.w.: 1 pipette of 2.68 mL, from 41 to 60 kg of b.w.: 1 pipette of 4.02 mL. Topic application.

Commercial Presentation

Pipette x 0.67 mL, Pipette x 1.34 mL, Pipette x 2.68 mL, Pipette x 4.02 mL,
