VETERINARY USE

Cefa-Milk® Forte

All you need for the treatment of mastitis

Cephalexin + Gentamicin + Dexamethasone + Vitamin A

(acts as an epithelial regenerator)

Instant effectiveness

Its broad spectrum acts against Gram-positive and Gram-negative bacteria that cause mastitis. Cefa-Milk® Forte provides rapid action within the first 24 hours.

Reduced animal stress

Dexamethasone provides a fast anti-inflammatory effect, relieving pain and discomfort caused by mastitis.

Regenerative effect

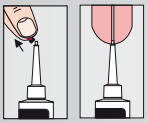

Vitamin A acts as an epithelial regenerator of the mammary gland.

Easy application

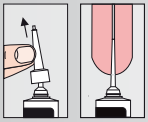

Its exclusive Duo-Cap® system allows deeper administration for better results.

Exclusive Duo-Cap® system

Remove the syringe cap to expose the short cannula. This application method protects the teat sphincter and canal.

Remove the protective cover to expose the full length of the cannula. This allows deeper administration.

Veterinary Use

Intramammary suspension for dry cows

Cefa-Sec®

Triple action, triple prevention against mastitis

Triple prevention

Its triple antibiotic action against Gram-positive and Gram-negative bacteria provides complete effectiveness in mastitis prevention.

More protection

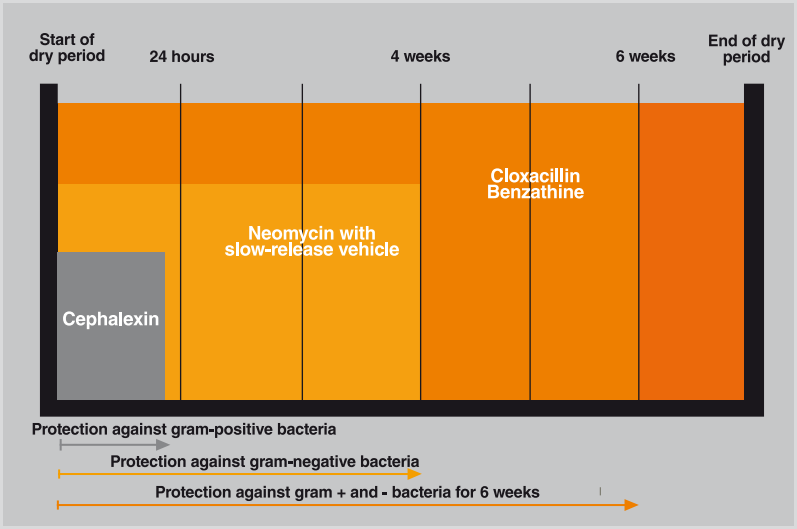

Up to 6 weeks of action during the dry period.

Regenerative effect

Vitamin A acts on the mammary epithelium as a regenerative promoter.

Easy application

Its exclusive Duo-Cap® system allows deeper administration for better results.

Cephalexin + Neomycin + Cloxacillin + Vitamin A *(acts as an epithelial regenerator)*
