ChickLyte® WS

FUNCTIONAL REHYDRATION

BALANCED FORMULA FOR THE PREVENTION AND TREATMENT OF DEHYDRATION IN ALL SPECIES.

ELECTROLYTES
GLUCOSE
PROBIOTICS
CHELATED MINERALS
GLYCINE

Soluble Powder

ChickLyte® WS

FUNCTIONAL REHYDRATION

ChickLyte® WS is a balanced association of electrolytes, chelated minerals, glucose, glycine and probiotics, specially designed for the prevention and treatment of dehydration. Restores electrolytes and improves the acid-base balance. Glycine increases glucose uptake and its 12 probiotic strains replenish the intestinal flora.

QUICK REHYDRATION

It provides essential electrolytes for rehydration. Replaces fluids, electrolytes and minerals lost, providing the hydro-electrolytic balance necessary for the organism.

ENERGY AND VIGOR

It provides immediate energy, reducing recovery time through increased glucose absorption (Dextrose + glycine).

FIGHTS ALKALOSIS

It limits the increase in blood pH during periods of high temperature.

NUTRITIONAL SUPPLEMENT

Fluid loss also involves a decrease of minerals in the body, **ChickLyte® WS** supplements them in a chelated form with methionine for greater absorption:

- Iron (iron-AHM)*
- Manganese (manganese-AHM)*
- Copper (copper -AHM)*
- Zinc (zinc-AHM)*

PROTECTION

Promotes intestinal integrity, restoring microbiota lost during diarrheal diseases.

UNIQUE FORMULA

KEY ELECTROLYTES

- [redacted]
  Restores normal intracellular potassium levels.
- **SODIUM PHOSPHATE**
  Important for processes such as the formulation of energy in the cell, structural function in the membrane and DNA.
- **SODIUM CHLORIDE**
  Maintains osmotic pressure, acid-base balance and water balance.
- **MAGNESIUM SULFATE**
  Restores magnesium values, involved in enzyme activity of some metabolic processes, ATP formation and direct energy availability.

PROBIOTICS

- The combination of 12 probiotic strains replenishes the intestinal microbiota and protects the tract from proliferation of pathogenic bacteria.

pH REGULATOR

- **ANHYDROUS CITRIC ACID**
- **TRISODIUM CITRATE DIHYDRATE**

GLYCINE

- Promotes glucose uptake and provides palatability to mask the flavors of the salts.

ENERGY

- **DEXTROSE MONOHYDRATE**
  Primary energy source, facilitates the absorption of sodium and thus water.

CHELATED MINERALS

- **ZINC-AHM ***
  Reduces the duration, severity, and recurrence of diarrheal episodes. Additionally, it restores appetite and serves as a key component of antioxidant enzymes.
- **IRON-AHM ***
  Transports oxygen through the bloodstream, combating fatigue and weakness caused by severe dehydration. Assists in energy metabolism.
- **COPPER-AHM ***
  An essential antioxidant for protecting cells and membrane lipids. A component of intracellular and extracellular enzymes that enhance iron absorption and transport.
- **MANGANESE-AHM ***
  Supports normal glucose metabolism. Promotes proper absorption and metabolism of mineral salts and is crucial for proper hydration and acid-base balance.

ChickLyte® WS

Soluble Powder

FUNCTIONAL REHYDRATION

ChickLyte® WS is indicated for the treatment and prevention of dehydration, electrolyte imbalance and energy deficiency:

- ✓ Diarrhea and vomiting.
- ✓ Prevention and support in the treatment of viral, bacterial or nutritional diarrhea. Indicated in cases of dysbacteriosis.
- ✓ Metabolic disorders: heat stress, acidosis, among others.
- ✓ Anti-stress support during routine management procedures, including vaccination, transit, and restocking; beak trimming in poultry, and weaning in piglets.

100 g 15 g 1 kg

DOSAGE AND ADMINISTRATION

Administered orally, in the drinking water, 2 to 3 times daily for 3 to 5 days.

Poultry: 1 kg/1000 L of water. **Swine:** 1 kg/750 L of water. **Suckling calves and foals:** 0.5 g/kg b.w. ó 30-40 g/L of water. **Fattening Calves:** 1 kg/500 L water *ad libitum*. **Lambs, goatlings and tuis: Individual:** 10 g per serving with water. **Group:** 150 g/10 L of water *ad libitum*. **Cattle, horses, rabbits and smaller animals:** Individual according to weight at 40 g/L of drinking water.

! Remove all sources of water that do not contain the product.

FORMULA

Sodium chloride 11 000 mg, monosodium phosphate dihydrate 5000 mg, potassium chloride 4000 mg, anhydrous magnesium sulfate 800 mg iron (as iron-AHM)* 334 mg, Manganese (as Manganese-AHM)* 1576 mg, copper (as copper -AHM)* 500 mg, zinc (as zinc-AHM)* 431 mg, 200 mg sodium citrate dihydrate, citric acid anhydrous 800 mg, 8000 mg glycine, dextrose monohydrate 56000 mg, 3 mg probiotics, lactose monohydrate q.s.ad. 100 g.

* **AHM**: Hydroxy-analogue of methionine
