

Floraviva® 12 Cepas

petmedica®

Combination of live probiotic
cultures and essential
nutrients

Protective, enhancing, and restorative
sybiotic formula for maintaining
intestinal balance in dogs and cats

Veterinary Use

Exclusive formula with 12 probiotics

Floraviva® 12 Cepas is a unique natural nutritional symbiotic association of living microorganisms (probiotics), along with other nutrients (prebiotics, enzymes, natural extracts, amino acids, vitamins, and trace elements) that helps to improve digestion and feed efficiency, as well as support the immune system.

Probiotics

They are microorganisms that balance the intestinal microbiota for the animal's benefit. Among their main benefits, they inhibit the growth of pathogenic bacteria and help maintain a healthy environment for the microbiota.

Prebiotics: MOS, FOS, and B-Glucans

They help to inactivate mycotoxins and prevent intestinal damage. They stimulate immunity and act as a substrate for probiotics and beneficial intestinal microbiota, improving the overall health of the gastrointestinal tract.

Lactoferrin

A glycoprotein naturally produced in the animal's body that inhibits the growth of pathogenic microorganisms.

An innovative formulation designed to optimize your pet's health

Amino Acids: Glutamic Acid and L-Threonine

Glutamine and threonine help in the regeneration and healing of the lining of the small intestine mucosa, maintenance of intestinal villi, formation of mucus in the intestine, and proper digestion and immune system maintenance.

Vitamins: A, B Complex, D3, E, and C

Vitamin A and the B complex help to maintain normal mucous membranes. Vitamin D3 has anti-inflammatory effects, and Vitamin E along with Vitamin C protect intestinal cells from oxidative stress.

Minerals: Copper, Zinc, and Manganese

They contain chelated minerals that enhance absorption. They contribute to enzymatic reactions, maintenance of mucous membranes, absorption and digestion of nutrients, and proper immune system function.

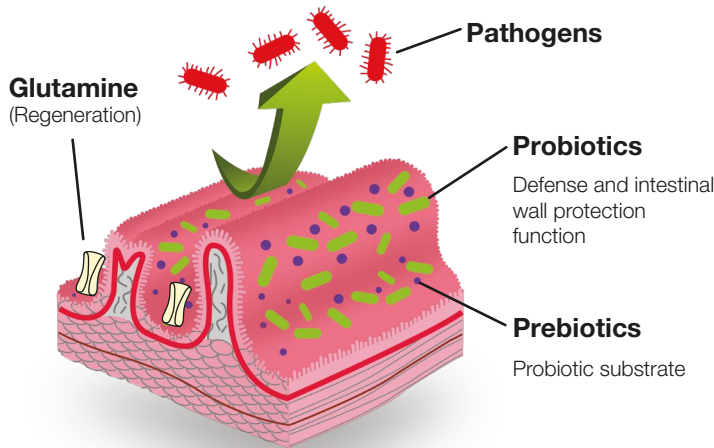

Yucca schidigera Extract

It improves fecal quality, reduces odor and decreases flatulence.

Floraviva® 12 Cepas

- ✓ Reconstitutes and stabilizes the intestinal microbiota and normal digestive function.
- ✓ Improves fecal quality and reduces flatulence.
- ✓ Useful during weaning or for young, growing animals.
- ✓ Indicated for senior animals.

Probiotics have beneficial effects on gastrointestinal health and positively influence nutrient bioavailability. One of their main mechanisms of action is "competitive exclusion," by binding sites on the intestinal epithelium, they prevent the adhesion of pathogenic microorganisms.

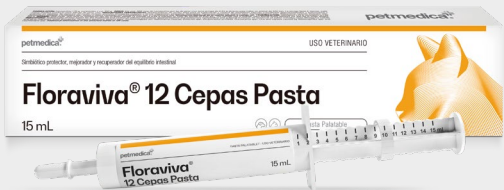

Dosage and Route of Administration:

For use in dogs and cats of all ages.

Floraviva® 12 Cepas Pasta

Administer orally, according to the size of the pet. Administer 1 to 2 times a day according to the following dosage*:

Weight 	 Dose	Weight 	 Dose
Puppies up to 4 kg	1 mL	Kittens	1 mL
Up to 8 kg	2 mL	Cats	2 mL
8 Kg to 13 kg	3 mL	*1 mL of product is approximately equivalent to 1.25 g	
13 Kg to 18 kg	4 mL		
More than 30 kg	5 mL		

Floraviva® 12 Cepas Soft Chews

Administer orally according to the size of the pet. Administer 1 to 2 times a day according to the following dosage:

Mini & Small		Medium & Large	
Weight 	Tablets	Weight 	Tablets
Puppies and Kittens up to 3 kg	 1/2 tab	15 Kg to 30 kg	 1 tab
Up to 5 kg	 1 tab	30 Kg to 45 kg	 1 1/2 tab
5 Kg to 15 kg	 1 1/2 tab	More than 45 kg	 2 tab
