COMPLETE PROTECTION
NOW IN A TOPICAL PIPETTE**

*12 weeks of protection against external parasites.

Unique formulation on the market

Atrevia® 360° Spot On is a breakthrough, comprehensive systemic antiparasitic treatment that protects dogs against fleas, ticks, and mites for 12 weeks, as well as a wide range of internal parasites.

Fluralaner

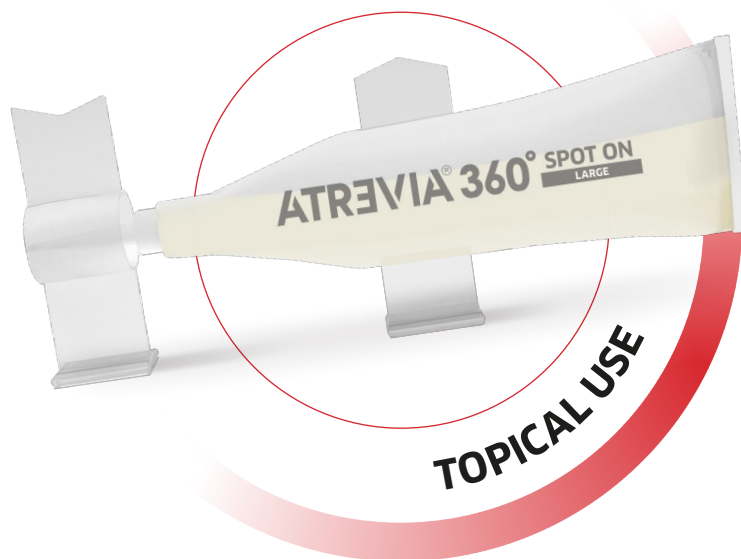

An Isoxazoline that acts by blocking ionotropic chloride channels in the nervous system of fleas, ticks, and mites; causing hyperexcitation, paralysis, and their subsequent death.

Praziquantel

A synthetic isoquinoline-pyrazine derivative. Rapidly absorbed, it alters membrane permeability in cestodes, resulting in contraction, paralysis, metabolic disruption, and finally, the death and expulsion of the parasite.

Moxidectin

A second-generation macrocyclic lactone. It inhibits the electrical activity of neurons in nematodes and muscle cells in arthropods, leading to ataxia, paralysis, and death.

pipette

TOPICAL FORMULATION

Atrevia® 360° Spot On, an innovative protection now in a convenient pipette. Its quarterly application aligns with real-world clinical deworming protocols and schedules.

BROAD SPECTRUM

Atrevia® 360° Spot On delivers lethal action against fleas, ticks, and mange mites. Continuous use assists in the control of immature stages. Furthermore, it targets internal parasites such as roundworms and is the only formula that eliminates cestodes (tapeworms).

HEALTHIER SKIN

Promotes full recovery in mange cases and serves as the perfect adjunct therapy for Flea Allergy Dermatitis (FAD).

WIDE WEIGHT RANGE

Indicated for dogs from 2.25 kg to 55 kg.

**Atrevia® 360° Spot On provides protection against tapeworms.

Dosage: Complete coverage for each dog size.
