Carnitol® PO

Nutritional supplement in oral paste

Improves the
ENERGY
METABOLISM

- + Up to 4 times higher concentration of L-Carnitine.*
- + Support for hepatic conditions.
- + Enriched with Vitamin B5.

Contains:
L-Carnitine 200 mg
D-Panthenol 20 mg

*compared to other formulations on the market.

Carnitol® PO

Flavored tabs for
dogs and cats

Nutritional supplement in oral paste

Carnitol® PO is a nutritional supplement that improves muscular adaptability for exercise and training. It enhances glycogen regeneration and fat metabolism, decreasing recovery time after exercise.

Helps delay the onset of fatigue and improves exercise performance.

Improves joint and connective tissue health.

Extends athletic life.

Increases energy level and metabolism.

Support in cases of cardiac, hepatic, and renal disease, as well as obesity, among others.

L- Carnitine

Vital amino acid that helps transfer fat into muscle cells to produce energy for muscle contractions, sparing glycogen and delaying lactic acid accumulation, which reduces soreness or fatigue after intense training sessions.

Dexpanthenol (D-Panthenol)

Participates in the formation of vitamin B5, an essential component of Coenzyme A for carbohydrate, lipid, and protein metabolism. It is fundamental for the normal functioning of the epithelium.

Dosage and administration

(Oral route once a day)

Cats

0.5 mL/5 kg of body weight.

Dogs

1 mL/10 kg of body weight.

*In cases of cardiac, hepatic, or renal disease, weakness, convalescence, gastrointestinal or appetite disorders: use the previous dose twice a day.
*Other disorders (musculoskeletal diseases, obesity, alterations in fat metabolism): Use the previous dose three times a week.
