Doxi-Tabs® LB 100/300

Doxi-Tabs®, palatable tablets. They ensure the complete dose is ingested and your treatments are finished successfully.

Antibiotic-probiotic combination to maintain the balance of the intestinal microbiota for the duration of the treatment.

Action against: Gram (+) and Gram (-) bacteria and microorganisms from the *Chlamydomphila*, *Mycoplasma*, and *Rickettsia* groups, which are sensitive to doxycycline.

Contains spore-forming bacilli that produce lactic acid, which are probiotics associated with improving specific and non-specific immunity, as well as balancing the microbiota.

Dosage and administration*

Presentation according to the weight of your patients.

Doxi-Tabs® LB 100 	1 tablet per every 10 kg every 24 hours*
Doxi-Tabs® LB 300 	1 tablet per every 30 kg every 24 hours*

*Dosage, frequency, and duration of treatment will depend on the the veterinarian's discretion and the pathology being treated.

**Administer directly or mixed with food.
