Gallomec Plus® Px

Ivermectin 0.21 g
Fenbendazole 5.10 g
Praziquantel 6 gt

Premix

Endectocide anthelmintic
combination for feed medication

- It is a premix based on ivermectin, fenbendazole, and praziquantel that act synergistically to deliver effective results.
- Treatment of choice for the control of internal and external parasite infestations.
- Broad-spectrum parasiticidal action with ovicidal , larvicidal, and adulticidal effects.

Avivet®

Gallomec Plus® Px

Ivermectin 0.21 g, Fenbendazole 5.10 g, Praziquantel 6 g.

Gallomec® Plus Px is an antiparasitic combination of ivermectin, febendazole, and praziquantel.

Ivermectin:

- Broad-spectrum antiparasitic active against endoparasites and ectoparasites. It acts by stimulating the release of the neurotransmitter GABA in invertebrates, causing paralysis and subsequent death of the parasites.

Fenbendazole:

- Exhibits high activity against various nematode species. It acts by inhibiting tubulin polymerization, altering cellular structure and function; additionally, it interferes with the nematode's energy metabolism, leading to its death.

Praziquantel:

- Acts specifically against cestodes. It induces severe damage to the integument, resulting in contraction, paralysis, metabolic impairment, and parasite death.

Broad Spectrum of Action

Nematodes

- **Gastrointestinal:** *Ascaridia galli, Heterakis gallinarum*.
- **Tracheopulmonary:** *Syngamus trachea*.

Tapeworms: *Davainea proglottina, Hymenolepis carioca.*

Ectoparasites:

Mites: *Cnemidocoptes* (leg, feather, skin, and tail mites) *Dermanyssus gallinae.*

Lice: *Menacanthus stramineus, Menopon gallinae.*

Dosage and administration

Oral administration mixed in feed. **Gallomec® Plus Px:** 1 g /10 kg b.w. for 3 days.

USE	BREEDERS	LAYER GROWERS	BROILERS
Light infestation	1.45 kg / ton	1.6 kg / t	1.6 kg / t
Heavy infestation	2 kg / ton	1.8 kg / t	1.8 kg / t

**In mixed tapeworm infections, repeat 2 weeks after the first dose. In case of massive mite infestations, a second administration one week later is recommended.*

Withdrawal period

Meat: 6 days **Offal:** 12 days
