

Longevia[®]

Preventive care for
dogs and cats

Strength & Vitality

Powerful antioxidant combination for adequate
metabolic performance and a healthy life.

Just like humans, pets also go through changes during the different stages of their lives.

Longevia® is that extra boost they need, helping them reach each stage with greater vitality, in better shape, and healthier.

L-Glutathione:

Known as the "master antioxidant" upon which the others depend to function correctly. It plays an essential role in liver and immune function, tissue repair, and controlling chronic inflammation.

Resveratrol:

Can reduce the risk of cancer. It has antihypertensive properties and can also promote neurological health. It stimulates the immune system by promoting the production of cytokines.

Coenzyme Q10 (CoQ10):

Neutralizes damage caused by free radicals. It is essential to produce ATP (energy) and promotes cardiovascular and immunological health.

Thioctic Acid:

Is involved in the production of energy (ATP) and increases the intracellular levels of glutathione, the most important antioxidant in the animal body.

Longevia®

- ✔ Provides more vitality and energy, improving physical performance.
- ✔ Improves the quality of life in animals with chronic illnesses or those that are convalescing.
- ✔ Promotes longevity, making it ideal for senior pets.

- ✔ Ideal for growing animals, those with high energy demands, or in stressful situations.
- ✔ Is an adjuvant in cases of obesity, cardiac problems, neoplasia, diabetes, and hepatic, renal, and hormonal disorders, among others.
- ✔ Improves cognitive abilities and attention span.

- ✔ Stimulates the immune response.
- ✔ Promotes the health of the skin and coat.
- ✔ Highly palatable in both presentations: Oral Gel and Soft Chews.

N-Acetyl Cysteine (NAC):

A nutritional precursor for the synthesis of glutathione, the most potent antioxidant.

Flavonoids: Hesperidin and Quercetin:

Provide antioxidant, anti-inflammatory, vasoprotective, anti-allergic, anti-cancer, and hypolipidemic action.

Amino Acids: Glutamic Acid, Glycine, and L-Carnosine:

They stimulate the immune system. L-Carnosine has anti-aging properties and is one of the most potent antioxidants.

Vitamins and Minerals:

Vitamin A for the proper function of vision, skin, and the reproductive system. Vitamins C and E assist with antioxidant function. Vitamin B6 promotes brain function. Also contains Zinc AHM and Seleniomethionine.

Omega-3:

Promotes the health of the skin and coat, as well as the nervous, cardiovascular, and joint systems. It also helps with cognitive and immune function.

For Dogs and Cats

Dosing and Administration

For use in dogs and cats of all ages.

Longevia® Oral Gel

Administer orally at a rate of 2mL for every 5 kg of body weight. Refer to the dosing table below.

*Shake before use. One application from the oral dispenser provides approximately 2mL.

**Doses can be divided throughout the day and administered directly with the dispenser or mixed with food.

Weight 	 mL/Day	N°. Dispenser Applications <i>swiftadoser</i> ®**
Up to 4 Kg	2 mL	1
4 Kg to 10 Kg	4 mL	2
10 Kg to 15 Kg	6 mL	3
15 Kg to 20 Kg	8 mL	4
20 Kg to 25 Kg	10 mL	5
25 Kg to 30 Kg	12 mL	6
30 Kg to 35 Kg	14 mL	7
Over 35 Kg	16 mL	8

Longevia® Soft Chews

Administer orally. Refer to the dosing table below.

*The tablet is highly palatable, soft, and chewable, which makes administration easy.

**If necessary, you may use the included Superchevs Cutter to split the tablet.

Weight 	Tablets/Day
Up 5 Kg	 1/2 Tab.
5 Kg to 15 Kg	 1 Tab.
15 Kg to 20 Kg	 1 1/2 Tab.
20 Kg to 25 Kg	 2 Tab.
25 Kg to 35 Kg	 2 1/2 Tab.
35 Kg to 40 Kg	 3 Tab.
Over 40 Kg	 3 1/2 Tab.

It's recommended to dose for a minimum of 6 to 8 weeks, but it can be administered for the animal's entire life, as it is safe at all times. Consult with your veterinarian. Read the insert before use
