

Otiderma-Cef®

Healthy skin and ears

**Ear infection,
No more!**

Otiderma-Cef®

Healthy skin and ears

Otiderma-cef® is a **unique combination** for treatment of **otic and derma problems** associated to allergies and/or organisms susceptible to gentamicin and/or cephalalexin. The addition of dexamethasone gives it a fast anti-inflammatory effect, and vitamin A maintains the tissues integrity.

Otiderma-Cef®

Cephalexin monohydrate 200 mg, Gentamicin 100 mg,
Dexamethasone sodium phosphate 0.75 mg, Vitamin A
palmitate 10 000 IU, excipients q.s. ad 10 mL.

- » Effective treatment of conditions such as acute and chronic external otitis, dermatitis and pyodermas.
- » Ideal for treating small cuts, wounds, lacerations or abrasions.
- » Provides relief to the pet by reducing inflammation and pain.
- » Its antiinflammatory effect allows the antibiotic reaches the infection focus better.
- » Vitamin A acts as an epithelial regenerator in infections or inflammations produced by pathogenic microorganisms.
