

# HELLO PROVENTIS<sup>®</sup>, BYE-BYE FLEAS!

The specialized tablet for eliminating  
and controlling fleas that provides  
protection for up to 30 days.

**Proventis<sup>®</sup>**  
Spinosad + Lufenuron

New Proventis<sup>®</sup>, the flea control specialist.

Proventis<sup>®</sup>

Spinosad + Lufenuron

Proventis<sup>®</sup> (spinosad+lunefuron) eliminates fleas before they lay eggs and interrupts their cycle, preventing them from reaching maturity.

It has a rapid action starting at 30 minutes, eliminating adult fleas at 4 hours.

ELIMINATES FLEAS STARTING AT 30 MINUTES

Minimizes re-infestations by stopping the biological cycle

Wide margin of safety

Protection for 30 days

Highly palatable

Easy administration

Spinosad powerful adulticide action

Natural compound, derived from the bacterial fermentation of *S. spinosa*.

High level of safety, a great alternative to neonicotinoids, phenylpyrazoles, and avermectins.

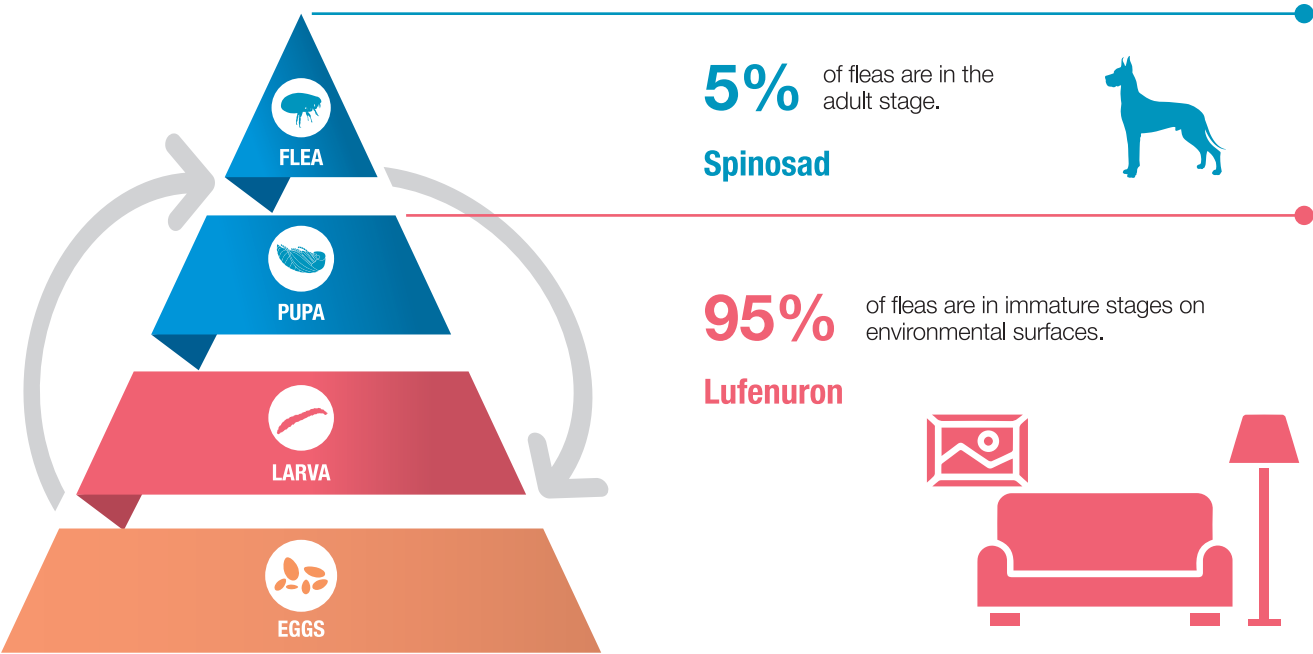

Reports show zero resistance worldwide.

DUAL ACTION: Adulticide + Environmental Control

|                     | SPINOSAD                                                                      | LUFENURON                                                                  |
|---------------------|-------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| Mechanism of Action | Interferes with the nervous system of the adult flea.                         | Hinders the development and growth process of immature stages.             |
| Effect              | Nervous excitation causing muscular contractions, prostration, and paralysis. | Inhibition of chitin formation, an essential component of the exoskeleton. |
| Result              | Eliminates the adult flea.                                                    | Prevents the hatching of eggs and kills larvae and pupae.                  |

THE INTEGRAL CONTROL OF PROVENTIS<sup>®</sup> MINIMIZES POSSIBLE RE-INFESTATIONS
