Mycoplasma spp.
Bordetella bronchiseptica

Effective against major diseases

Bronchopneumonia // Pasteurellosis // Bronchitis // Tracheobronchitis // Rinitis // Pneumonia // Shipping fever // Fibrinous pleuropneumonia // Bacterial complications secondary to viral diseases

The importance of early treatment at the first signs of infection

There are multiple factors that favor the appearance of respiratory conditions. Respibiotic® 48 horas limits the effects of respiratory disease rapidly, preventing damage to lung tissue.

It is important to remember that an animal with a compromised respiratory tract may be at greater risk for infections, poor performance, a chronic condition or even mortality.

The power of active 5 ingredients

Avoid financial losses in the future. Use Respibiotic® 48 horas and BREATHE EASY

Dosage and application:

1 mL for each 10 kg b.w. By deep IM route.
Repeat treatment after 48 hours if necessary.

Target species:
