PRODUCTION AND GROWTH

- Helps in the treatment of diseases, infections, intoxication, and states of convalescence and dehydration. Recommended in cases of nutritional deficiencies.
- Growth promoter. Triggers hormonal and metabolic functions.
- Regulates the functions and activities of the nervous, instestinal, gastric, hepatic, and hormonal systems.
- Stimulates fertility and viability of offspring during intensive reproductive rhythms

Nucleotides are molecules that constitute DNA and RNA, necessary for the reproduction of all the cells of the body and essential for the biological functions. They are advanced nutrients.
