ASCORVET 250/CEVITAL

Injectable Solution

Powerful Antioxidant - Immune Response, Synthesis of Amino Acids and Collagen Enhancer

Formulation

Vitamin C 250 mg, excipients q.a.sd. 1 mL

Indications

Used in convalescent animals to increase resistance to diseases by strengthening the immune system. Stimulates antibody formation and improves post-vaccinal immune reaction. Promotes collagen production, protects epithelium and avoids secondary invasion. Favors healing process. Reduces immunity suppression due to stress.

Dosage and Administration

1 - 10 mL/animal, depending on condition and weight of the animal. Cattle and horses: 10 mL; calves, colts, sheep, goats, alpacas: 5 - 10 mL; dogs, cats, lambs, kids and tuis: 1 - 2 mL. Apply through intramuscular or intra venous route.

Commercial Presentation

Bottle x 100 mL,
