ATREVIA® ONE X-MINI

Soft Chews

Oral Ectoparasiticide of Immediate Action of Monthly Application

Formulation

Each 500 mg chewable tablet contains: Fluralaner 25 mg + excipients and flavorings q.s. to 1 tablet

Indications

For the control of infestations of the main ectoparasites in dogs (ticks, fleas, and mites) when one month of protection is required, in both young dogs (e.g., in early stages between 2 and 6 months old) and adult dogs. Systemic insecticide and acaricide with immediate action. - Treatment and prevention of flea infestations (Ctenocephalides felis and Ctenocephalides canis). Additionally, it controls flea infestations in the environment and areas where the animal has access. - Treatment and prevention of tick infestations (Ixodes ricinus, Ixodes hexagonus, Ixodes scapularis, Ixodes holocyclus, Dermacentor reticulatus, Dermacentor variabilis, and Rhipicephalus sanguineus (adults and juveniles)). - Treatment of skin mite infestations: demodicosis (Demodex canis) and sarcoptic mange (Sarcoptes scabiei var. canis). - Treatment of ear mite infestations (Otodectes cynotis). - Treatment of infestations by kissing bugs of the species Triatoma infestans. - Treatment and prevention of lice infestations (Linognathus spp.) for 7 weeks. - Control of flea allergy dermatitis (FAD) as part of a therapeutic strategy. - Prevention of the transmission of Babesia canis (the causative agent of canine babesiosis), transmitted by ticks of the genus Dermacentor reticulatus.
