CEFTIODURE® 100 L.A

Injectable Suspension

Extra long-acting antibiotic up to 7 days of effectiveness with one single dose - Zero milk residues

Formulation

Ceftiofur (as free acid) 100 mg, excipients q.s. ad 1 mL.

Indications

Extra long-acting and broad-spectrum cephalosporinic antibiotic, effective against Gram-positive and Gram-negative bacterias including strains that produce B-lactamases. Effective for the treatment of respiratory diseases (BRD, shipping fever, pneumonia) and interdigital necrobacillosis in dairy cattle. In pigs, for the treatment of respiratory diseases associated with Actinobacillus, Pasteurella, Haemophilus, and septicaemia processes, polyarthritis or polyserositis. In horses, for the treatment of the lower respiratory tract caused by susceptible strains of Streptococcus equi.

Dosage and Administration

Pigs: 1 mL/20 kg of b.w. single dose, intramuscular route in the post auricular region of the neck; cattle: 1 mL/15 kg of b.w. single dose, subcutaneous route in the base of the ear (back dorsal rear of the ear where the head is conencted); horses: 1 mL/15 kg of b.w. intramuscular route.

Commercial Presentation

Bottle x 100 mL,
