DENASYL® E SMALL

Soft Chews

Nutritional Supplement for Liver Support with Antioxidant, Hepatoprotective and Choleretic Properties.

Formulation

Each 750 mg tablet contains: S-Adenosyl Methionine Disulfite Tosylate (Equivalent to S-SAMe) 100 mg, Silybin (Equivalent to Silybin (A+B)) 26mg, D Alpha Tocopherol Acetate (Vitamin E) 90 IU Excipients q.s.ad 1 tablet.

Indications

Adjuvant to improve liver efficiency and restore liver damage and injuries. When required, it increases and improves hepatic glutathione levels, maintain/improve healthy liver function and detoxification, facilitate digestion and nutrient absorption, increase antioxidant levels in general and/or promote brain health. Specific indications: as an adjuvant in cases of hepatic lipidosis, cholangiohepatitis, chronic hepatitis or secondary to treatments that can damage the liver system, compromised liver function due to poisoning, among other reasons.

Dosage and Administration

Orally, daily. Due to its palatability, it can be administered directly or with a small amount of food. For optimal absorption, the tablets should be administered on an empty stomach, at least one hour before food, since the presence of food decreases the absorption of S-adenosylmethionine.

Commercial Presentation

Box x 1 blister of 10 tablets, Box x 3 blister of 10 tablets,
