DORAQUEST® DUO

Oral Paste

Oral endectocide exclusive for horses

Formulation

Doramectin 1.78 g, praziquantel 22.29 g, vehicle q.s.ad. 100 g

Indications

Effective for the control of internal (gastrointestinal and lung nematodes and tapeworms) and external parasitosis, such as lice and myasis problems in horses. It contains praziquantel, the most effective antiparasite against immature and adults forms of all types of tapeworms (cestodes). The special formulation of doraquest duo confers it a nice apple flavor, which makes it a very palatable paste, getting an easier dosage.

Dosage and Administration

The 6.73 g syringe has 6 notches, each notch measures the product for 100 kg of body weight. Administer through oral route.

Commercial Presentation

Dosing syringe x 6.73 g,
