DUO-DEXALONG® | DUOVETASONA

Injectable Suspension

Fast action and prolonged effect dual corticosteroid

Formulation

Dexamethasone 21 sodium phosphate 3.2 mg, Dexamethasone acetate monohydrate 3.63 mg, excipient q.s. ad 1 mL.

Indications

Whenever a rapid and long-lasting corticosteroid action is required. It is also indicated in cases of nutritional syndromes, metabolic disorders, non-infectious inflammatory syndromes (synovitis, bursitis, arthritis, tendinitis, traumatic injuries, among others). It is associated to antibiotherapy treatment in cases of osteoarthritis, lymphangitis, arthritis, bronchopneumonia, septicemia, mastitis and urogenital tract infections, among others.

Dosage and Administration

Cattle, sheep, goats and horses: 2.5 - 10 mL; pigs: 0.5 - 1 mL; dogs: 0.125 - 0.5 mL; cats: 0.06 - 0.125 mL. In joints, synovial bursa and sheath: 1 - 2 mL for big animals; peritendinous infiltrations: 10 mL for big animals and 2 - 3 mL for small animals. Apply through intramuscular, subcutaneous or intrasynovial route.

Commercial Presentation

Bottle x 100 mL,
