DUOTAK FF®

Topical Solution

Long-acting ectoparasiticide with environmental effect

Formulation

Fipronil 10 mg, Fluazuron 25 mg, excipients q.s.ad. 1 mL

Indications

For the treatment and control of ticks (Boophilus microplus), protecting animals from adult forms of tick during a period up to 12 weeks. It is also effective against horn fly, dermatobiasis nodular (“tupe” or “nuche”) and biting and sucking lice.

Dosage and Administration

Cattle: 1 mL/10 kg of b.w. Apply along the dorsal line from the withers to the base of the tail. A second treatment after a recess of 3 to 6 months is recommended. Apply through epicutaneous route.
