ECTONIL® POUR ON

Pour On Topical Solution

Tick killer and insecticide of multiple action and extended effect

Formulation

Fipronil 10 mg, excipients q.s.ad. 1 mL

Indications

For the treatment and control of horn fly, ticks, Dermatobia spp. ("tupe" or "nuche"), biting and sucking lice, and myiasis (worms). It has high efficacy against strains resistant to pyrethroids and organophosphates used against horn flies and ticks.

Dosage and Administration

Cattle, sheep, camelids and horses: 1 mL/10 kg of b.w. Apply on the dorsal line, between the withers and the base of the tail; guinea pigs and poultry: 2 drops per kg of b.w. applied on the back. The interval between treatments should be of at least 2 months, but it will depend on the severity of the infestation. Apply through epicutaneous route.

Commercial Presentation

Bottle x 30 mL, Bottle x 500 mL, Bottle x 1 L,
