IVERQUEST®

Oral Gel

Oral Endectocide exclusive for horses

Formulation

Ivermectin 1.75 g, excipients q.s.ad. 100 g

Indications

Broad spectrum endectocide to be administered as flavored oral gel, effective in the control of internal (gastrointestinal and pulmonary nematodes) and external parasitosis, such as lice and myiasis problems in horses. The special formula of iverQuest® provides a pleasant apple flavor, which makes a very likeable gel that facilitates the complete dosage.

Dosage and Administration

The 6.84 g syringe has 6 notches. Each notch doses product for 100 kg of b.w. Administer through oral route.

Commercial Presentation

Dosing syringe x 6.84 g,
