KET-A-100®

Injectable Solution
Fast-acting dissociative anesthetic

Formulation

Ketamine (as hydrochloride) 100 mg, excipients q.s. ad 1 mL.

Indications

For premedication, induction and maintenance of anesthesia. It can be used in combination with other injectable or inhalational drugs, obtaining a better anesthetic result. In short general anesthesia, for immobilization of the patient in order to perform short surgical actions or minor diagnostic procedures. In anesthesia of patients with increased risk, since it does not endanger the cardiorespiratory system of the animal. It is the choice in cesarean operations, due to the absence of fetal toxicity.

Dosage and Administration

Dogs: 5 - 15 mg/kg intravenous route, or 15 - 25 mg/kg intramuscular route; cats: 5 - 8 mg/kg intravenous route, or 22 - 33 mg/kg intramuscular route; horses: 2 - 5 mg/kg intravenous route or 8 -15 mg/kg intramuscular route; cattle: 2 - 5 mg/kg intravenous route, 15 mg/kg intramuscular route, or 2 mg/kg epidural route; pigs: 2 - 5 mg/kg intravenous route, or 15 - 20 mg/kg intramuscular route; sheep: 2 - 5 mg/kg intravenous route, or 10 - 20 mg/kg intramuscular route; poultry: 12 - 70 mg/kg intramuscular route.

Commercial Presentation

Bottle x 20 mL, Bottle x 30 mL, Bottle x 50 mL,
