# MICROQUEL® ZN PX

**Premix**

Organic microelement chelated as zinc-amino acid complex and protected with glycine for production animals.

## Formulation

Zinc (as glycine zinc chelate): not less than 21% by weight. Microquel® Zn also contains 23% of the amino acid glycine of high nutritional value.

## Indications

Prevention and treatment of zinc deficiencies in production animals. Specific indications include: Prevention and treatment of foot and health problems of the hull, egg shell quality, reduced fertility rates, increased incidence of pneumonia and diarrhea, weaning weights at weaning. In cases of bone weakness, dwarfism, delayed growth and high conversion rate. Improvement of wound healing, integrity and keratinization of the skin (prevents parakeratosis in pigs), improves the shine, quality and coloration of the coat (feathers in the case of birds). Improves the immune response, improves the quality and production of meat and eggs.

## Dosage and Administration

Poultry: 100 - 240 g / TM (20 - 50 ppm Zn). Swine: Piglets up to 25 kg of P.v. 380 - 480 g / MT of food (80 - 100 ppm Zn); growing and fattening pigs 240-300 g / MT of food (50-60 ppm Zn); Marranos 500 g / MT of food (100 ppm Zn).

## Commercial Presentation

Box x 20 kg,
