# OTIDERMA-CEF®

**Otic Suspension**

Antibiotic-antiinflammatory combination

## Formulation

Cephalexin monohydrate 20 mg, Gentamicin 10 mg, Dexamethasone sodium phosphate 0.075 mg, Vitamin A palmitate 1 000 IU, excipients q.s. ad 1 mL.

## Indications

For the treatment of conditions as acute and chronic external otitis, dermatitis and pyodermas, lacerations, abrasions or when it is necessary to reduce the inflammation and the pain. The addition of dexamethasone and vitamin A reduce the consequences of the infectious process and participate in maintaining the integrity of tissues, respectively.

## Dosage and Administration

To treat external otitis and other inflammatory conditions of the external ear, fill the external auditive canal with a sufficient quantity of the suspension until the area to treat is completed. To its use in skin or mucous membranes, clean the affected area and apply a small quantity of the suspension, distribute or rub smoothly. The treatment should be done 1 to 3 times a day, depending of the veterinary doctor criterion.

## Commercial Presentation

Syringe x 15 mL,
