POWERQUEST®

Palatable Paste

Nutritional Supplement for Muscular, Cardiac and Hepatic Support of High Performance Horses

Formulation

Each 1 g contains: L- Carnitine 200 mg, D- Panthenol 20 mg, Excipients q.s.ad 1 grams.

Indications

powerQuest® is indicated as an adjuvant when required: Improved performance in training and competition. Improves glycogen regeneration, decreasing post-exercise recovery time. Maintenance of functionality, adaptability and muscle power. Recovery support and delay in the onset of fatigue. Increased energy level and metabolism, increased appetite. Supplementation of nutritional deficiencies or physiological increase in component requirements. Support for optimal fat metabolism. Support in cases of heart disease, liver, kidney, debilitation, convalescence, gastrointestinal disorders, poor appetite, skeletal muscle disease, obesity/alterations in fat metabolism. Improvement of joint and connective tissue health. Improvement and extension of sports life.

Dosage and Administration

powerQuest® is administered orally, directly from the syringe: Adult horses: 10 mL three times per week (breeding stallions, mares, racehorses). In cases of exercise or competition: 24 hours and 4-6 hours before training, strenuous exercise or event. Neonates/Foals: 1-2 mL/50 kg body weight three times per week.

Commercial Presentation

Box containing one 60 mL syringe,
