Indications

As support and assistance for: -Reducing the progression of chronic kidney disease. -Specifically minimizing each of the side effects, symptoms, and metabolic consequences of kidney failure. -Improving overall health at all stages of chronic kidney disease (early or advanced).

Dosage and Administration

It is administered orally sprinkled or mixed with food, according to the weight of the pet, at a rate of 1 g per 2.5 kg, once a day. To facilitate administration, Prorenal® CKD Px is offered together with two measuring spoons: one of 1 g (enough for 2.5 kg of body weight) and one of 4 g (enough for 10 kg of body weight). The duration of the dosage will depend on the problem and the response observed, always at the discretion of the veterinarian.
