VETPRO® DERMACARE SODIUM SALICYLATE, ZINC G

Medicated Shampoo

Antibacterial - Antimycotic - Antiseborrheic - Keratolytic

Formulation

Each 100 mL contains: Sodium salicylate (eq. salicylic acid) 1 g, Zinc Gluconate 0.5 g, Pyridoxine Hydrochloride 0.5 g, Excipients q.s.p 100 mL

Indications

Treatment and control of keratoseborrheic disorders (oily or sicca) in dogs, cats and horses. This product helps regulate the keratinization process and the production of natural fat to improve skin health. Relief of symptoms associated with mild bacterial and fungal skin infections, or as an adjunct to other systemic treatments.

Dosage and Administration

Dermal topical route through use in the bath. Dogs As a general rule, the animal should be shampooed twice weekly until symptoms subside and then weekly, or as needed, to keep the condition under control as advised by your veterinarian. Cats Bathe at least twice a week, until hair cultures are negative for M. canis. The maximum duration of treatment should not exceed 16 weeks. Depending on the length and type of hair, it should be considered if it is necessary to shave it before the treatment. Horses Wet and apply a sufficient amount of shampoo, massage vigorously, rinse with plenty of water.
